

LFG: Looking for Group

Connecting Gamers Across All Platforms

Team Members: Navjeet Hundal, Victor Lieu, Ajit Pawa

What is LFG

- Our goal for this app is to create a platform where users can search for other players to play with across multiple gaming platforms (PC, XBOX, etc.)
- No need to link all of your gaming accounts, like many other applications force users to do
- Essentially, it is an app that has a community of players that are looking for people/groups to play with

Who LFG is for?

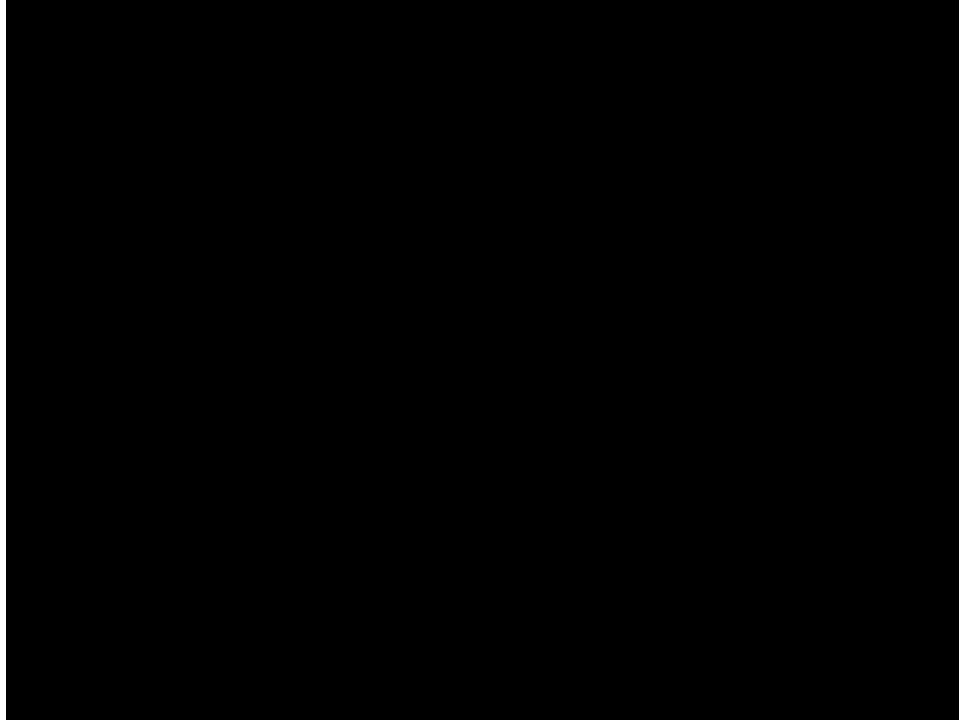

- Anyone who is looking for other people to play games with
- All types of gamers regardless of platforms
 - Xbox, PC, Playstation, Nintendo Switch

Value Proposition

- Have you ever been playing a game and get to a mission that requires a certain number of players to complete but none of your friends are available or you don't have any? :(
- Since so many games nowadays focus heavily on multiplayer aspects, it can be really frustrating to find others to play with
- Many popular games have their own niche LFG websites and apps but it's hard to find all your favorite games in one place without having to constantly link all your different gaming accounts
- LFG allows users to connect with each other quickly and easily

Possible Upgrades in the Future

- Chat functionality for group owners and accepted members
- User profiles
- Profiled based matching
- Game and post suggestions
- Quality of life changes, UI design changes

Thanks for listening!
